

PRIVACY POLICY

AuctionSound is wholly owned by That's Us Technologies, Inc. (collectively referred to as "AuctionSound", "we", "us" or "our"). We have established this privacy policy to explain how your information is collected, used and protected. We reserve the right to change this policy and will provide notification of any material change on this web site. You may contact us with any questions regarding this policy at accounting@auctionsound.com.

This policy does not apply to the practices of companies that we do not own or control, or to people that AuctionSound does not employ or manage. In addition, certain companies associated with AuctionSound, such as eBay, have their own privacy statements that we do not control.

Data Collection and Storage

During the registration and AuctionSound account creation process, we collect account information including user name and password and contact information such as name, email and telephone number. Each of these different types of information is used to provide the AuctionSound service. Registration information is used to authenticate users, and contact information is used both for service-related communication and as an integral component of the application. In some cases, contact information will be sent to third party syndication partners who have the ability to anonymize email addresses.

Using our site to bid, research, sell, or buy items on eBay may require that you generate an eBay token allowing our systems to perform operations on your behalf without requiring you to enter or store your eBay password in our system. This token will remain valid for 1 year or until you reset your eBay password. By posting feedback, responding to feedback, or using other tools within our website to perform an action connected with your eBay account, you are authorizing us to transmit the provided information to eBay and retain an archive of the transaction on our server. In addition, an authorized representative of eBay may occasionally request your contact information in order to resolve a service issue or dispute. In such cases, the information provided will be limited to contact name(s), telephone number(s) and / or email address(es) associated with your account.

All user information contained within the application will remain your property. We will continue to make that data available to you as long as you are a user. If at some point AuctionSound sells all or a portion of its assets, or merges with another entity, user information is an asset that may be transferred or acquired by a third party. After such a transaction, the third party that becomes the custodian of the user information would have the right to continue using the user information solely as set forth in this policy.

As is true of most web sites, we gather certain information automatically and store it in log files. This information includes internet protocol (IP) addresses, browser type, internet service provider, referring and exit pages, operating system, date/time stamp, and click stream data. We use this information, which does not identify individual users, to analyze trends to administer the site to track users' movements around the site and gather demographic information about our user base as a whole.

All collected information is stored in our database, and, even after deletion, may be archived. Unless otherwise stated, our web logs and other records are stored for at least 36 months.

If you do not want to receive e-mail from us in the future, please let us know by sending us e-mail at the above address.

If you supply us with your postal address on-line you will only receive the information for which you provided us your address.

With respect to Ad Servers: We do not partner with or have special relationships with any ad server companies.

In order to protect consumers and businesses, AuctionSound cooperates with law enforcement agencies and inquiries. When requested by a verified law enforcement or government official in relation to an alleged illegal activity or criminal investigation, you authorize us to disclose your name(s), mailing and billing address(es), telephone number(s) and email address(es), and AuctionSound UserID(s) and comprehensive history of activity on our Site(s) without a subpoena. AuctionSound may also respond to subpoenas, court orders, or legal process, or turn over other personal information to exercise our legal rights or defend against legal claims;

With respect to the constant evolution of international, national, and local regulations, we cannot ensure that your information and communications will never be disclosed or intercepted in ways not outlined within this Policy. We use industry standard practices to protect your privacy, but we do not promise (nor should you expect) that information intended to remain private will always remain so.

We believe it is necessary to share information in order to investigate, prevent or take action regarding illegal activities, suspected fraud, situations involving potential threats to the physical safety of any person, violations of AuctionSound terms of use, or as otherwise required by law.

AuctionSound may share some or all of your personal information with another business entity in the event that we are acquired by that business entity, have plans to merge with, or actually merge with that business entity. In this event, we may notify you but are not required to do so, before information about you is transferred and becomes subject to a different privacy policy.

From time to time, we may use customer information for new, unanticipated uses not previously disclosed in our privacy notice. If our information practices change at some time in the future we will post the policy changes to our Web site to notify you of these changes and provide you with the ability to opt out of these new uses. If you are concerned about how your information is used, you should check back at our Web site periodically.

Customers may prevent their information from being used for purposes other than those for which it was originally collected by e-mailing us at the above address.

AuctionSound does not target its offerings toward, and does not knowingly collect any personal information from users under 18 years of age.

Syndication and Links to Third Party Sites

AuctionSound, or others who use our service, may transfer listing information and/or provide links to third party web sites, which may have different privacy practices. We make no representations or warranties about the policies and practices of sites that are linked to by AuctionSound or its users. We urge you to consult the policies available on those sites to further understand your rights. AuctionSound will never sell, rent or share your personal information with any third parties for marketing purposes without your express permission.

Security

We have implemented processes designed to protect user information and maintain security. Each registered user is assigned a unique user name and password which is required to access their user information. It is the user's responsibility to protect the security of their login information. Although we make good faith efforts to store the information in a secure operating environment that is not available to the public, we cannot guarantee complete security.

Cookies

AuctionSound uses cookies to assist in delivering the service and to provide a personalized user experience. Cookies are small text files stored on your computer's hard drive for record-keeping purposes. Our persistent and session ID cookies are used to identify unique visitors to our sites and to provide you with easy access to your files. If you choose to not accept cookies, you may still use our site, but your ability to use some areas of our site may be limited.

Confidentiality and Security

We limit access to personal information about you to employees and independent contractors who we believe reasonably need to come into contact with that information to provide products or services to you or in order to do their jobs. Your information is stored on AuctionSound servers located in the United States. We have physical, electronic, and procedural safeguards that comply with federal regulations to protect personal information about you. Fool-proof security on the Internet, however, cannot be guaranteed, nor does it exist.

Changes to this Privacy Policy

AuctionSound may update this policy. We may notify you about significant changes in the way we treat personal information by sending a notice to the primary email address specified in your AuctionSound account or by placing a prominent notice on our site. Changes to the privacy policy will be automatically effective when posted on the site or notification has been sent.
